& Energetics Lab**

**PhD Student Opportunity:** Demographic and bioenergetic responses of fish to a whole-lake addition of microplastics

The [Community Ecology and Energetics lab \(CEElab\)](#) at Lakehead University is currently recruiting a **domestic (Canadian citizen or permanent resident) PhD student** interested in participating in an innovative, one-of-a-kind whole lake experiment at the IISD Experimental Lakes Area to investigate the impact of microplastics exposure on a whole lake aquatic ecosystem. The anticipated start date for the position is Fall of 2022.

The CEElab is led by Dr. Michael Rennie, a Canada Research Chair in Aquatic Ecology and Fisheries at Lakehead University. He is also a Research Fellow with the world-renowned [IISD-Experimental Lakes Area \(ELA\)](#), an unparalleled outdoor research facility in Northwestern Ontario that has conducted whole-lake research to better inform environmental policy since 1969.

Research will be conducted at the ELA, as part of the collaborative [pELAstics](#) investigation, led by Dr. Chelsea Rochman, Dr. Diane Orihel and Dr. Michael Rennie, and involving PI's and collaborators from across Canada and North America, all leaders in the investigation of plastics on aquatic ecosystems.

The student will contribute to the collection of field data and analysis of data to support demographic and bioenergetic analyses, including age determination, mercury and energy density analyses of tissues, and work collaboratively with researchers at the University of Toronto and University of Manitoba to evaluate food web changes determined through diet analysis and stable isotope analyses.

Lakehead University is located on the shores of Lake Superior, and is the only research-intensive Canadian University in Northwestern Ontario. It is well situated for supporting collaborations with other institutions, approximately 3 hours drive from Duluth and 6 hours from the ELA. Funding for the position is highly competitive; if a student is secured prior to May 1 2021, there is a strong possibility of support in the amount of \$35,000 per year (including a TA-ship), with possible extensions of this level of support for up to 4 years.

Interested students should send a CV, cover letter expressing interest and relevant skills, as well as a copy of recent unofficial transcripts to [mrennie@lakeheadu.ca](mailto:mrennie@lakeheadu.ca). Review of applications will start April 1<sup>st</sup>.
